1. Sponsor and Project Information

	New – A new proposal being submitted for the first time to this sponsor		
1.1. Proposal Type New	Resubmission – A revised version of a previously submitted proposal that was not funded by this sponsor Competitive Renewal – A proposal to continue a funded project beyond its approved project period that will compete with all new applications in the same funding cycle (sometimes called a competitive continuation)		
Resubmission Competitive Renewal			
Supplement	Supplement – A request for additional funding for an existing award to expand its scope, add new components, or address unexpected circumstances		
Pre-proposal	Pre-proposal – A condensed preliminary proposal (sometimes called a letter of		
O IncomingTransfer	intent, concept paper, or white paper) Incoming transfer – An award transferring to Syracuse University from another institution accompanying a new faculty appointment		
1.2. Deadline Date			
mm/dd/yyyy			
1.3. Sponsor 1.4. Prime Sponsor	Sponsor – The entity providing funding to Syracuse University directly Prime Sponsor – The originating source of funds, which may or may not be Syracuse University's Sponsor		
1.5. Solicitation Identifier or Program Nan If there is no formal identifier or program name, ent program.			
1.6. Solicitation URL			
1.7. Project Title

Next >

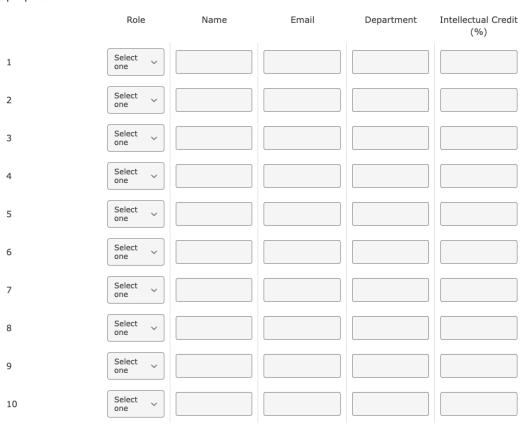

2. SU Senior/Key Personnel

2.1. For all <u>Syracuse University</u> Senior/Key Personnel named in the proposal, select from the following role options:

See next page for definitions.

- Principal Investigator (PI)
- Co-Principal Investigator (Co-PI)
- Co-Investigator (Co-I)
- · Other Sr/Key Person

Intellectual Credit % is <u>required for ECS proposal</u> and optional all other proposals.

2.2. If this project is part of a recognized Syracuse University Center or Institute, provide the center/institute name; otherwise, leave blank. (Do not fill in department or school/college name.)

- Principal Investigator (PI) Identifies the individual responsible for activities on a research project or activity, particularly those funded by a grant, a cooperative agreement, a training or public service project, a contract, or other sponsored mechanism. Responsibilities include the intellectual conduct of the project, fiscal accountability, administration, and compliance, including the submission of all required reports. For the purposes of this definition, when used throughout, the term Principal Investigator also includes Project Director (PD), and the term co-PI also includes co-PD. Note: The National Institutes of Health (NIH) allows two or more individuals to share responsibility for the conduct of the project. These individuals are referred to by NIH as Multiple Principal Investigators (MPI). For MPI proposals, select PI for each MPI. The first PI listed will serve as the Contact PI and must be affiliated with the submitting institution.
- **Co-Principal Investigator (Co-PI)** A senior member of the key personnel team whose role is similar to that of the PI in determining the intellectual content, direction, and conduct of the research or program activities. A Co-PI may share equal responsibility with the PI for project oversight, budget management, and reporting as part of a multi-investigator team or may direct a particular portion of the project and retain limited administrative oversight over the award. NIH does not recognize Co-PI as a role.
- **Co-Investigator (Co-I)** An individual the PI relies on to assume responsibilities above those of other personnel who make significant contributions to the sponsored project or program. A Co-I does not have overall responsibility and authority for the sponsored project or program which lies with the PI (or PIs on a NIH MPI project). Co-Is can be named in the proposal provided the sponsor accepts the role.
- Other Senior/Key Personnel Identifies a senior/key member of the project team who is named in the proposal and shares administrative, fiscal, and scientific conduct with the PI on research projects, but does not have a specific sponsor defined role designation as referenced above.

3. Project Type

instance, "primary" means that over 50% of the project? In the instance, "primary" means that over 50% of the project's properfort and associated expenditures are related to one of the thractivities described below.	sed
Research & Development (R&D)	
○ Instruction	
Other Sponsored Activity	

Research & Development (R&D) (also known as "Sponsored Research" or "Organized Research")

- All separately budgeted and accounted for R&D activities that are sponsored by Federal and non-Federal agencies and organizations (2 CFR 200 Appdx III).
- R&D is creative and systematic work undertaken in order to increase the stock of knowledge—including knowledge of humankind, culture, and society—and to devise new applications of available knowledge (see <u>NSF NCSES – IV. US Higher Education R&D</u>).
 - o "Research" is the systematic study directed toward fuller scientific knowledge or understanding of the subject studied (2 CFR 200.1).
 - "Development" is the systematic use of knowledge and understanding gained from research to produce useful materials, devices, systems, or methods, including designing and developing prototypes and processes (2 CFR 200.1).
- Research Training: The term "research" also includes activities involving the training of individuals in research
 techniques where such activities utilize the same facilities as other research and development activities and
 where such activities are not included in the instruction function (2 CFR 200 Appdx III).

Instruction (also known as "Training")

- Specific instructional or training activity established by a grant, contract, or cooperative agreement (2 CFR 200 Appdx III).
- Includes the teaching and training activities of an institution. Except for research training (as defined in "Sponsored Research"), this term includes all teaching and training activities [...] (2 CFR 200 Appdx III).
- Examples of sponsored instruction projects include those for teaching, curriculum development, and nonresearch training.

Other Sponsored Activity (also known as "Other")

- Programs and projects financed by Federal and non-Federal agencies and organizations which involve the
 performance of work other than instruction and organized research (2 CFR 200 Appdx III).
- Examples of such programs and projects are health service projects and community service programs (2 CFR 200
 Appdx III).

Display this question Given that the primary activity of the proposed sponsored project is "R&D," what is the project's primary type of research as defined below? In this instance, "primary" means that over 50% of the project's proposed effort and associated expenditures are related to one of the three types of research. Basic Research Applied Research Experimental Development Basic Research - Experimental or theoretical work undertaken primarily to acquire new knowledge of the underlying foundations of phenomena and observable facts, without any particular application or use in view. Creative and scholarly activities are included in the definition of "Basic Research." Applied Research - Original investigation undertaken in order to acquire new knowledge. It is directed primarily towards a specific, practical aim or objective. Experimental Development – Systematic work, drawing on knowledge gained from research and practical experience and producing additional knowledge, which is directed to producing new products or processes or to improving existing products or processes. 3.3. Based on planned expenditures, does the project involve primarily on-campus activity or off-campus activity? Use of the off-campus F&A rate requires approval of the Vice President for Research. On campus Off campus < Previous Next >

The PI and/or other project personnel, as applicable, must secure approx department chair for effort commitments outside regular duties. Docume be submitted to the ADR and OSP prior to proposal submission.		< Previous	Next >	

7. Commitment of University Resources

PIs should discuss with their ADR the impacts of the proposed project on institutional resources and any long-term needs that may extend beyond the life of the award.

If "Yes" to any question in this section:

Please route documented prior approvals with the Proposal Approval Form.

7.1. Does the project require use or purchase of equipment, machine- shop time, software, furniture, or other resources not budgeted for in the proposal?
Yes
○ No
7.2. Does the project require renovation or upgrades of space or facilities (e.g., hoods, air conditioning, biological safety, electrical, networking)?
Yes
○ No
7.3. Does the project require use of space not currently allocated to the PI and/or construction of new space or facilities?
Yes
○ No
7.4. Does the project require commitment of financial or in-kind support of any effort not budgeted for in the proposal?
○ Yes
○ No

7.5. Does the project require commitment of financial or in-kind support due to project personnel salaries exceeding the sponsor's salary cap?		
Yes		
○ No		
7.6. Does the project include commitment of remitted tuition for graduate students that exceeds school/college policy for sponsored projects?		
Yes		
○ No

If you are ready to submit, enter your email address to receive your Proposal Approval Form (PAF).

Next Steps: Routing for Approvals and to OSP

- 1. If you completed this form on behalf of the Principal Investigator (PI) and you are not the PI, forward the PAF to the PI for review and approval.
- 2. The PI, or their delegate, should attach, a project summary, the internal budget (using the OSP Budget Template), and any other pertinent documentation and send via email for approval as follows:
 - If the PI is in the department of Biology, Chemistry, Communication Sciences and Disorders, Earth and Environmental Sciences, Physics, Psychology, Biomedical and Chemical Engineering, Civil and Environmental Engineering, Electrical Engineering and Computer Science, or Mechanical and Aerospace Engineering, email the PAF to the PI's Department Chair for approval. The PI's Department Chair is responsible for coordinating additional reviews and approvals, as applicable, including from (but not limited to) the Department Chair(s) and/or ADR(s) in collaborating School/College/Department(s). The PI's ADR is responsible for coordinating review and approval from the Vice President for Research (VPR), if required.
 - In all other departments/schools/colleges, email the PAF to the PI's Associate Dean for Research (or
 equivalent) for approval. The PI's ADR is responsible for coordinating additional reviews and approvals,
 as applicable, including from (but not limited to) the ADR(s) and/or Department Chair(s) in
 collaborating School/College/Department(s) and/or the VPR.
- 3. Upon receiving final approval, the PI, or their delegate, should submit the PAF, all approvals, and the proposal documents to the OSP RA for compliance review prior to proposal submission to the sponsor. Approvers should reference the PAF Form Instructions for full process steps and responsibilities.

Approvers should reference the PAF Instructions for full process steps and responsibilities.
